

ATS_SCORE:

78

(The resume showcases a good mix of technical skills, projects, certifications, achievements, and educational background.)

SKILLS:

- Machine Learning: Regression, Classification, Clustering
- Languages: C++, Python, Java, C, JavaScript, Streamlit
- Database Management: MySQL, MongoDB
- Frameworks & Libraries: HTML and CSS, Bootstrap, NumPy, Pandas, Matplotlib, Seaborn, Hadoop, Scikit Learn
- Tools/Platforms: n8n, Automation Anywhere, VS Code, Excel, Power BI, Linux
- Soft Skills: Problem-Solving, Team Player, Adaptability

MISSING_SKILLS:

- Specific details about experience with certain frameworks or technologies
- Experience with cloud platforms other than Oracle Cloud
- More advanced project experience showcasing complex problem-solving skills

CAREER_SUGGESTIONS:

- Machine Learning Engineer
- Data Scientist
- Software Developer

INTERVIEW_QUESTIONS:

- Can you walk me through the process of building and deploying your AI-powered personal

assistant?

- How did you handle data preprocessing and feature engineering in your movie recommendation system project?
- Can you discuss a specific challenge you faced in developing the Blinkit Sales Dashboard and how you overcame it?

LEARNING_RESOURCES:

- Advanced courses on cloud computing platforms like AWS or Azure
- Advanced courses on specific machine learning algorithms and techniques
- Hands-on projects to showcase experience with different technologies

ROADMAP:

1. Further develop expertise in cloud computing platforms like AWS or Azure.
2. Dive deeper into advanced machine learning algorithms and techniques.
3. Work on more complex projects that showcase problem-solving skills and application of various technologies.
4. Stay updated on the latest trends in the tech industry and continuously enhance soft skills like teamwork and adaptability.
